

Jumbo High Speed Laser Rolls

Quality Guaranteed

Jumbo High Speed Laser Rolls are converted to meet or exceed OEM quality standards for reliability and run ability on High Speed Roll Fed Printers.

Quality Assurance

Pre and Post-Production checks: Moisture, Caliper, Sheffield, Perforation Strength.

Capabilities

- Width - 8 1/2", 9 1/2", 11", 12", and 18"
- Repeat Length - 5.5", 8 1/2", 11"
- Weight - 18lb, 20lb, and 24lb
- Standard Formats - Blank, tic marks, 1/2" Green Bar, 1/2" Blue Bar
- Punching - 3HP, Top and Bottom
- Internal Perforations

Converting Standards

- Vacuum Systems
- Sheer Slitting System
- Computerized Re-Winders
- Floating Punch Rings

Packaging

- Unwind direction is identified by both arrow tape around circumference of roll, and a directional arrow on the side of the roll.
- Custom Labeling including specific information, safety procedures, and usage instructions. Each roll is identified with a core label containing the roll number, quantity, and P.O. Number.
- Each roll contains an end of roll mark, indicating the end of usable forms on the roll.

Palletizing

- Fiber chocks are used, both front and back of each roll, to help prevent roll movement on pallet after strapping has been removed.
- Each roll is individually wrapped with stretch-wrap to insure moisture content and damage free product.
- Double strapped to pallets to prevent movement during transit. Plastic banding is used, providing a secure load.
- Moisture barrier is placed between the rolls and pallet.
- Specially designed pallets of heavy-duty construction to handle load weights at key points.

 The wood fibers used to make this paper product come from sustainable sources approved by a recognized forest certification program.
