Encad NovaJet Pro	GO	Enhanced Multipass	350%
ColorSpan	Dye/UV	Photobase Setting	300%
Other Piezo (Water based)	Dye/UV	1440 dpi mode	350%

*Over-Saturation can cause paper cockle, head strike and poor lamination results.

LAMINATION

Can be overlaminated with most cold and low-temp hot laminates. Better adhesion is achieved using cold laminate. Overlap the image with minimum .25 inch safe edge to prevent moisture absorption and premature paper splitting. Lamination can be performed immediately after printing as long as the inks are dry to the touch and do not smear.

MOUNTING

Recommended mounting material is cold, pressure-sensitive adhesive to provide the best bond.

Lamination & Mounting
